Command: gcc -S P2.c -o P2.s

-S : To stop execution at compiling phase

-o : To name the output file

Error: None

Warnings:

Warning 1: Return type defaults to 'int'

Explanation: Return type of function add has not been declared, so the default return type of the given function is 'int'.

Warning 2: implicit declaration of function 'round'

Explanation: function round has not been declared before it is used in the program.

Warning 3:incompatible implicit declaration of built-in function 'round'

Explanation: since function round is already present , so we would either provide a declaration of the function 'round' or include the <Math.h> header file in our program.
